CAREER SUMMARY

Software Developer • Web Developer • Full-Stack Engineer

- Innovative and detail-oriented Software Developer with strong experience building modern, scalable applications across web and backend environments. Adept at transforming business needs into technical solutions through clean, efficient, and maintainable code.
- Skilled in JavaScript/TypeScript, React, Node.js, SQL databases, and API development bringing hands on experience designing responsive interfaces and robust backend systems.
- Strong background in debugging, testing, version control, and Agile development methodologies, ensuring timely and quality project delivery.
- Proven ability to collaborate cross-functionally, adapt quickly to new technologies, and deliver solutions that align directly with business and user needs.

AREAS OF EXPERTISE

- JavaScript / TypeScript
- React.js
- Node.js / Express.js
- REST API Development
- SQL Databases
- Version Control (Git/GitHub)
- Responsive Web Design
- Software Testing & Debugging
- Agile / Scrum
- Cloud Deployment (e.g., Render, Vercel)
- System Design & Architecture

PROFESSIONAL EXPERIENCE

Kenyatta University, Nairobi, Kenya

Junior Software Developer (IT Department)

Kenyatta University is one of Kenya's leading public universities with a fully equipped IT Department responsible for managing enterprise systems, networks, and in-house application development.

- Joined the IT team to support software development tasks, database management, and system troubleshooting.
- Assisted in building and maintaining internal applications used across various university departments.
- Developed frontend components and backend logic for small-scale systems using JavaScript, TypeScript, React, Node.js, and SQL.
- Participated in testing, debugging, and documenting system workflows to ensure smooth operation of internal systems.

Key Achievements:

- Contributed to improving internal digital workflows by creating tools that reduced manual operations.
- Provided reliable technical support, helping reduce downtime and increasing system efficiency.

Improved application data handling processes by redesigning internal API flows.

- Automated key tasks, reducing manual workload for the internal team.

EDUCATION

Bachelor of Science in Business Information Technology
Dedan Kimathi University of Science and Technology

ADDITIONAL SECTIONS

Technical Skills

Programming: JavaScript, TypeScript, HTML, CSS, SQL

Frameworks: React, Node.js, Express.js

Tools: Git, Postman, VS Code, Docker basics

Testing: Jest, React Testing Library

Operating Systems: Windows, Linux

Certifications

- JavaScript / React Certification
- Backend Development Certification
- Cloud Computing Basics
- Introduction to Cyber Security
- Ethical Hacking
- Linux Essentials
- Introduction To internet of things and Digital Transformation
- Introduction To Networks

Projects

- **Employee Leave Management System** – Full-stack web application with authentication, dashboards, and API integration.
- **Cybersecurity Awareness App** – Mobile app for phishing detection and training.
- **Car booking management system** - A full-stack web application designed to streamline vehicle booking, scheduling, and fleet management for organizations or rental companies.
